

NET SLIDES TO AN END

SPECIFICATIONS

This simple indoor batting tunnel setup is ideal for low ceiling applications such as basements with exposed rafters, garages or any multi-use facility. The kit is easy to install and the size can be adjusted on site and installed specifically to your location's needs. Support cables are installed on side walls and the tunnel net attaches directly to the cable with pulleys and c-snaps. When the indoor batting tunnel net is not in use, the net is easily stored by sliding it to one end of the facility and out of the way.

KIT INCLUDES

- (1) – Spool, 500' 1/4" Cable
- (70) – Steel C-Snaps
- (70) – Split Bracket Pulleys
- (6) – Turnbuckles
- (12) – 1/4" Wire Cable Clamps
- (6) – Eyebolts
