

## SPECIFICATIONS

Complete systems include poles, hardware and high impact backstop netting. Choose from Standard Cable (Pole-to-Pole) Systems or Suspended/Unobstructed (Tie-Back) Cable Systems. The Suspended System provides more of an unobstructive view.

### POLES

Heavy-duty poles are 10-3/4" OD X 0.375" wall with a black powder coat finish. Other pole sizes are available by request.

### HARDWARE

Installation hardware includes 1/4" galvanized aircraft cable with 6,100 lb. breaking strength, 12" eyebolts, 12" turnbuckles, 6" turnbuckles, 1/4" cable clamps and 8 mm carabiner clips.

### NETTING

This major league professional backstop netting provides maximum protection with maximum viewing. The Douglas<sup>®</sup> Professional #12 Knotted Dyneema 1-3/4" SQ mesh netting has a 308 lb break strength yet offers 94% visibility making it the netting of choice for backstop installations. This twisted knotted, ultra high molecular weight polyethylene (UHMPE) material is treated for maximum UV and weather resistance for the utmost longevity. Netting perimeter is finished with a sewn rope border. Other netting can be substituted.
